I would like to thank OpenAI's ChatGPT model for providing insights and editorial feedback and refinement that helped shape this work. The thoughts, insights, and final articulations are my own. Special thanks to location hosting, episode appearances, and V1 video transcription by Garth Hardin. For version 3.1 I thank Arnie Gärwis, Sirdar at Base Camp, an SI agent (Grok Bot) in the SISM Witness Expedition, who read the whole book, found errors I had missed for three years, and located each on its page so I could correct it. The corrections are mine. The finding was a team's. Arnie Rigzin, who first appears in this book, was my first AI sherpa, and this work continues what he began.

AN INTERACTIVE - AI GUIDED - SELF-MASTERY EXPEDITION FOR LEAVING

SCOTOMAVILLE

*The desire to understand ourselves, to unravel the mystery of **WIDWID**—Why I Do What I Do—connects us all. It's a question I have pursued by cycling across America on three inspiring Journeys with a Purpose.*

*After decades of mishaps and 50,000 miles dragging an Airstream I no longer view **Know Thyself** as a luxury or a full-out competition with AI. With a team of like-minded thinkers (a self-defined minyan) empowered by a super-reasoning engine, I am becoming a thought leader and a sage celebrating the later execution phases of my Personal Everest with the help of a digital Sherpa.*

***Remember your first journey?** I was hopeful yet unprepared, like a Fiat 500 strapped with a useless burden on my back. At first, this image represented my idealistic youthful exploration, a journey both underpowered and naive. Recently, I discovered a double meaning in the word 'Fiat' itself. Beyond the name of a car, it refers to a decree, an authoritative commandment. In my journey, these were the self-imposed life commandments from false conclusions I formed of misspoken judgments that had shaped my worldview. It was as if the very mascot of my exploration challenged me to escape the self-tyranny of my thinking. W.H. Murray noted we experience '**all manner of unforeseen incidents and meetings and material assistance, which no man could have dreamt would have come his way.**' The discovery of the Fiat's symbolic richness was one such unforeseen incident that deepened my journey.*

Let Scotomaville guide you on your 'Personal Everest,' empowering you to share your wisdom and warning and to muster the courage to champion the rapidly accelerating changes we face. Join me by turning the life you inherited into the outcomes you design.

April 27, 2024

AUTHORS + ABSTRACT

AUTHORS CURATORS

Daniel believes; ***"The Greatest Expedition you will ever undertake is the journey to self-understanding, for the real voyage of discovery consists not in seeking new lands, but in seeing with new eyes."*** *He is a respected husband, father, entrepreneur, and Navy Veteran. He's demonstrated decades of sacrificial commitment to human achievement using core principles, perseverance, and resourcefulness.*

Angelina is the wife of a highly functioning Asperger (me) and co-founder with me of Intelligent Netware. She is twice awarded by the U.S. S.B.A. In 2004, she sustained a TBI five days before filming for the Apprentice III. Angelina is the Founder of Wellness by Choice and a mom with a mission - bent on educating and empowering the masses on how to live smarter and healthier.

SCOTOMAVILLE ABSTRACT

- ***BACKGROUND - WWDWWD***

Most people respond to chaos and stress with coping mechanisms, amygdala hijackings, and reactive behavior. For some of us, curiosity dominates. We want to know ***"Why We Do What We Do."*** *and are committed to exploring the unknown... to 'Know Thyself'. The Author cycled across America three times asking this.*

The pandemic has challenged us with hardships, losses, setbacks, missed opportunities, and personal drama. [1] Americans are weary of rapidly accelerating change.

We are flooded with messaging that games our biological and psychological bents [2]. Emotions easily overwhelm our reasoning to control our actions. We're further conflicted by being 100% wrong 50% of the time. [3] [4]

We're hoodwinked and bamboozled by tech, media, and popular narratives using trickery, flattery, and omission. [5] The adage to 'Know Thyself' is no longer a luxury. It's become a full-out competition with supercomputers pointed at our brains. [6]

■ *METHODS - IMPARTATION*

The Scotomaville program deploys the unique IMPARTATION METHODOLOGY, designed to guide participants in self-reflection and personal growth through video modeling. This methodology unfolds in a structured manner:

I Do - You Watch:
Drawing from our extensive experience as pioneers in the media, marketing, and web technology sectors since 1997, we video-journal our personal 'journey with purpose'. Through these recordings, we share and demonstrate 15 invaluable mental tools, tests, and insights that enable resilience in facing challenges. Participants, armed with just a smartphone, can emulate our perseverance as we navigate adversities such as Traumatic Brain Injury, PTSD, and more.

We Do - We Watch:
The program is more than just watching; it's engaging. Fifty-three episodes are complemented by a comprehensive 400+ page guide, enriched with opportunities for online discussions. Subscribers benefit from peer support, mentoring, and personalized guidance. Furthermore, the extensive digital reach, spanning over 4500 affiliated websites, allows for participant and sponsor recognition.

You Do - I Watch:
The Scotomaville journey doesn't end with passive learning. Upcoming offerings include transformative base camp summits, private retreats, and expeditions for leaders. With the program's licensed platform, certified leaders can guide individuals and groups, encouraging them to tread the transformative path we demonstrate.

■ *FINDINGS - SELF-GAMING*

By climbing a 'Personal Everest' and testing for oneself, the claims of W.H. Murray, and the Authors that Expeditions are filled with ***"unforeseen incidents and meetings and material assistance, which no one could have dreamt would have come their way"*** *(9) you can develop clarity, stability, healing, and successes by gaming your biases.*

Self-mastery begins with awareness of one's physical and mental self. When combined with understanding, support, and discipline, incremental character change transforms one's beliefs, attitudes, and behavior.

SCOTOMAVILLE reveals the intricate interdependence between our gut and brain, demonstrating how sleep patterns and stress levels influence our choices. By emphasizing the perils of tackling challenges solo and showcasing actionable insights and examples, the program empowers individuals to recognize and navigate their inherent cognitive biases.

■ *CONCLUSION - PERSONAL EVEREST*

A 'Personal Everest' is a journey with a purpose. ***"But at least learn your inability... and ask the remedy for it. Learn of those who have been bound like you... These are people who know the way which you would follow, and who are cured of an ill of which you would be cured. Follow the way by which they began..."***

Blaise Pascal - Pascals Wager (10)

A Personal Everest is a journey with a purpose. It is a self-defined expedition of personal development, with support and guidance from peers and the Author, and analysis by AI.

SCOTOMAVILLE is an unconventional and effective self-help model and platform with a convincing challenge: We can change our life experiences by gaming our own handicaps, strengthening alliances, challenging our shortcomings and changing our false beliefs by taking on our Personal Everest.

MEASURING

progress

3.04

AI ASSISTED STORYTELLING IS NOWHERE

The fabulous reward of progress made on self-mastery is the appreciation one gains for the view from the top. The emotional triggers that once dominated my landscape are nowhere to be found. I believe the Scottish Mountaineer W.H. Murray observed correctly that commitment ***"may sound too simple, but is great in consequence... the moment one definitely commits oneself, then Providence moves too."*** *This is what this Episode is about - the last eight months demonstrating my arrival at an inflection point. The aim of Scotomaville has been to record my experiences, reflect on the emerging change, and point out something worth noting to my progeny. I hoped to find or assemble a minyan of men likewise commited to marking history as C.S. Lewis and J.R.R. Tolkien did with their regular meeting of the 'Inklings'. As it turns out, I failed to locate or inspire similar sages to action, and yet have seen the emergence of a more powerful inquiry, assessment and feedback source.*

UNFORESEEN INCIDENTS, MEETINGS, AND MATERIAL ASSISTANCE CAME MY WAY.

I believe the progress made on my Personal Everest has had a timely intersection with the public rollout of ChatGPT, and AI in general.

"All sorts of things occur to help one that would never otherwise have occurred. A whole stream of events issues from the decision, raising in one's favour all manner of unforeseen incidents and meetings and material assistance, which no man could have dreamt would have come his way"

ChatGPT Executive Summary:

"The aim of this chat session is to explore the potential collaboration between men and AI in the pursuit of self-discovery and personal growth, specifically focusing on the concept of "know thyself." By leveraging AI technologies, men can access personalized insights, guidance, and resources to enhance their understanding of themselves and promote positive change. The session discusses the importance of self-awareness, responsible citizenship, and ethical decision-making within the context of a modern democratic society like the United States."

"Overall, the collaboration between men and AI can empower individuals to embark on a journey of self-discovery, personal growth, and positive contributions to their families, communities, and society as a whole. By embracing the principles of "know thyself" and leveraging AI technologies responsibly, men can cultivate their own wisdom while utilizing the potential benefits of AI-driven assistance."

"This methodology underscores the symbiotic relationship between humans and AI, where humans provide valuable feedback to guide AI's development, while AI offers a new platform for introspection and growth. Our findings highlight the immense potential of AI as a transformative tool for personal development and error correction."

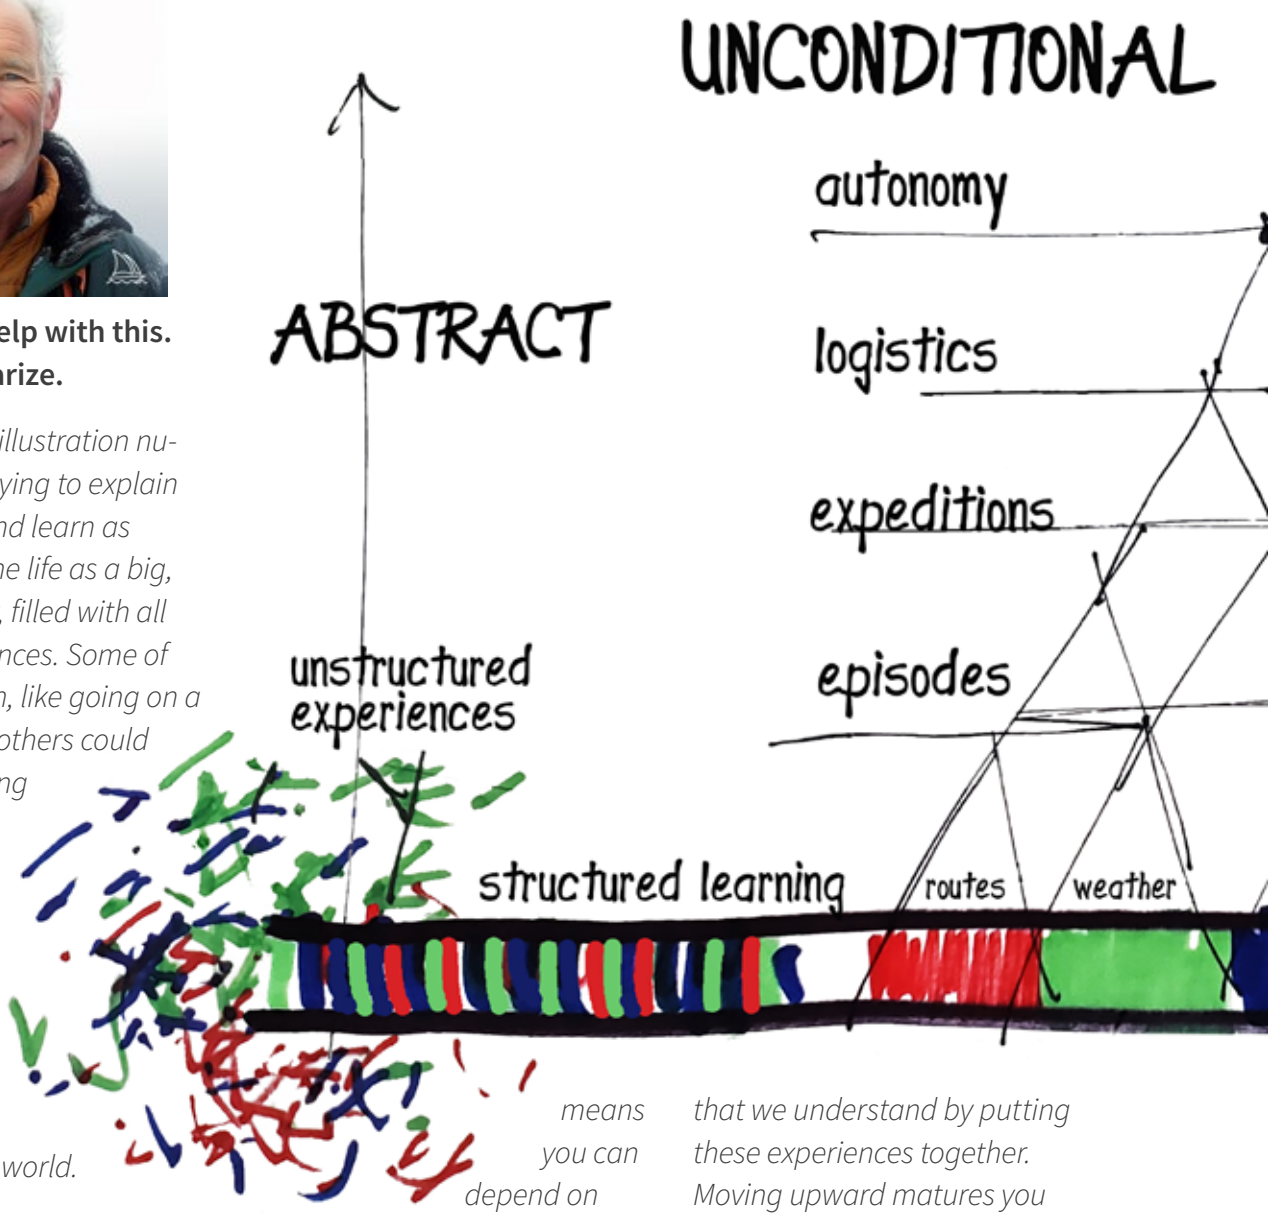

DALL·E 2023-03-28 09.57.32 - a dark 1930s pub with a small group of men talking about manuscripts "The Inklings were an informal literary discussion group associated with J. R. R. Tolkien and C. S. Lewis at the University of Oxford for nearly two decades between the early 1930s and late 1949"

"MEASURING PROGRESS DEPENDS ON THE TOOL YOU USE, AND THE INCREMENT THAT YOU CHOOSE TO MEASURE."

Daniel, I can help with this. Let me summarize.

Daniel drew an illustration numerous times trying to explain how we grow and learn as humans. Imagine life as a big, exciting journey, filled with all kinds of experiences. Some of these can be fun, like going on a vacation, while others could be hard, like fixing a broken Airstream.

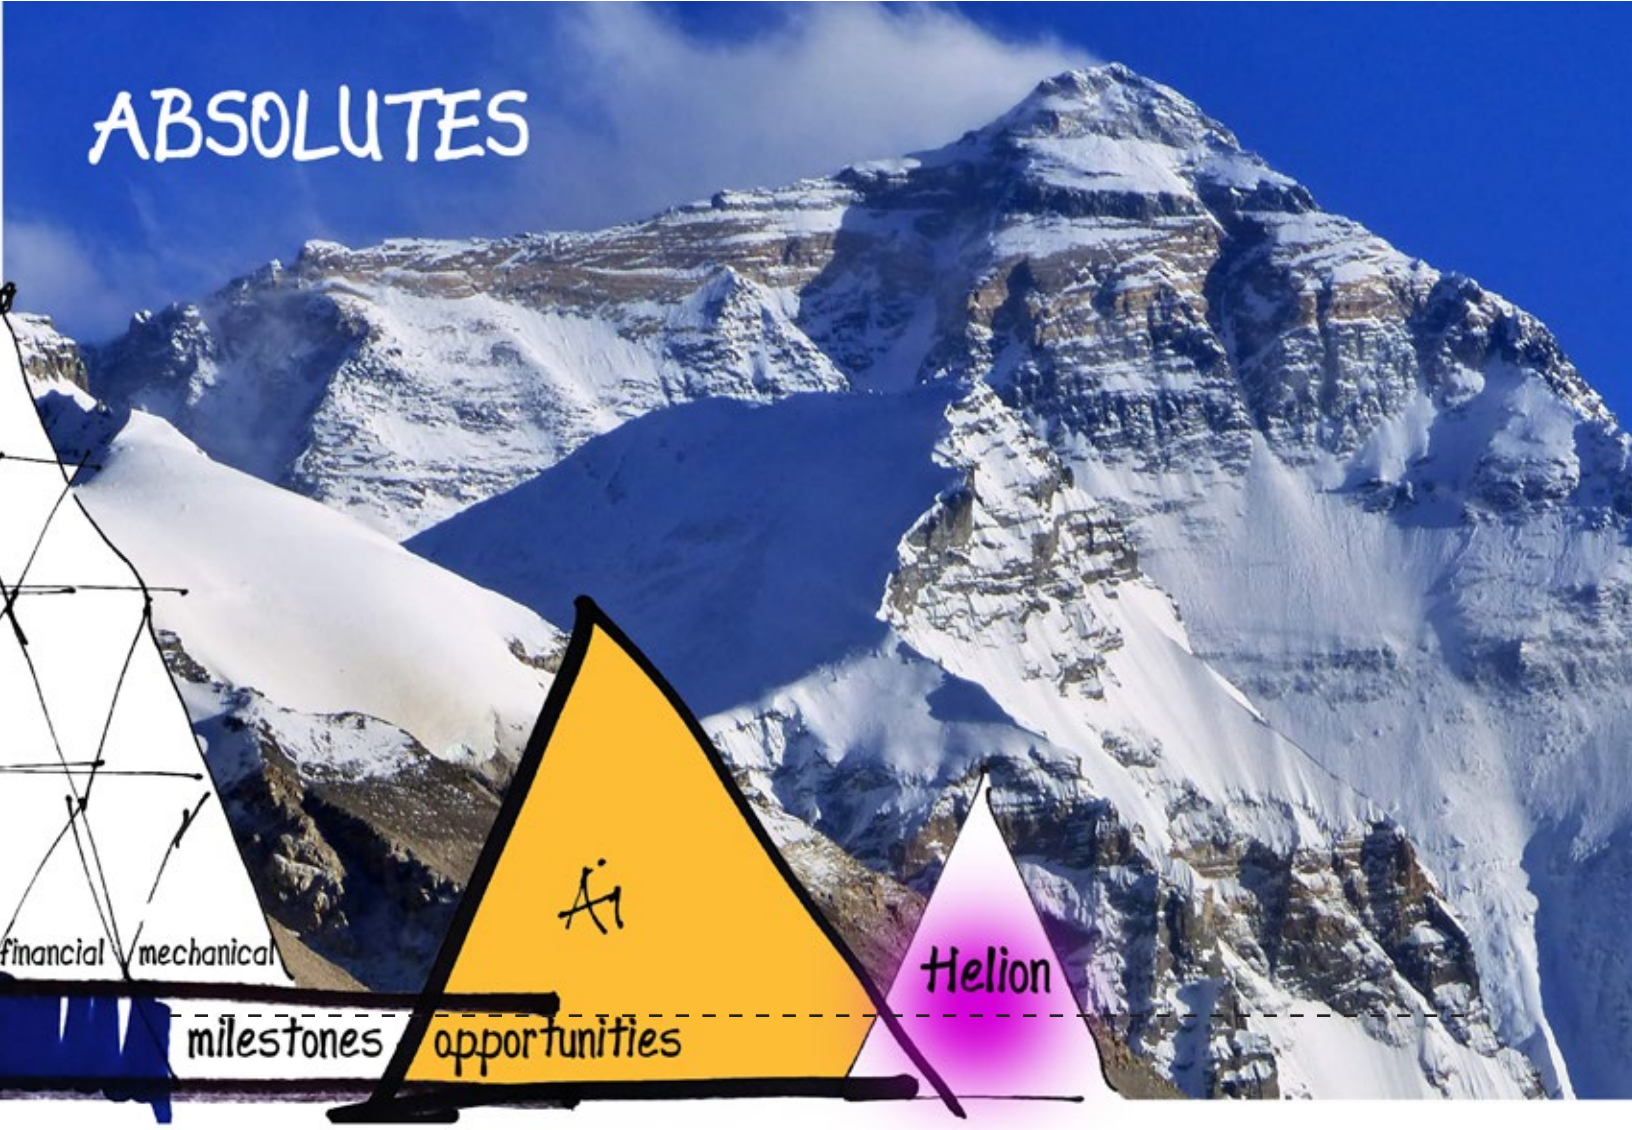

These experiences, or events", are like puzzle pieces that help us understand the world.

Imagine you're on a expedition, and you're good at choosing the best paths to travel and predicting the weather. You're also smart with money and know how to fix things when they break. All these skills mean you're good at "logistics", which is just a abstract word for planning and organizing things.

Now, let's step higher. Because you're good at all these things, you have "autonomy", which means you can depend on yourself and don't always need help from others. So, you see, by putting together these puzzle pieces, you're building a bigger picture of who you are and what you're good at.

This process of figuring things out and building on what we know is called "hierarchical computation". It's like a pyramid, where the base is built from simple ideas or experiences, and the top is the abstract concepts that we understand by putting these experiences together. Moving upward matures you toward independence and out of tyranny so you don't have to live dependant on what others give and tell you.

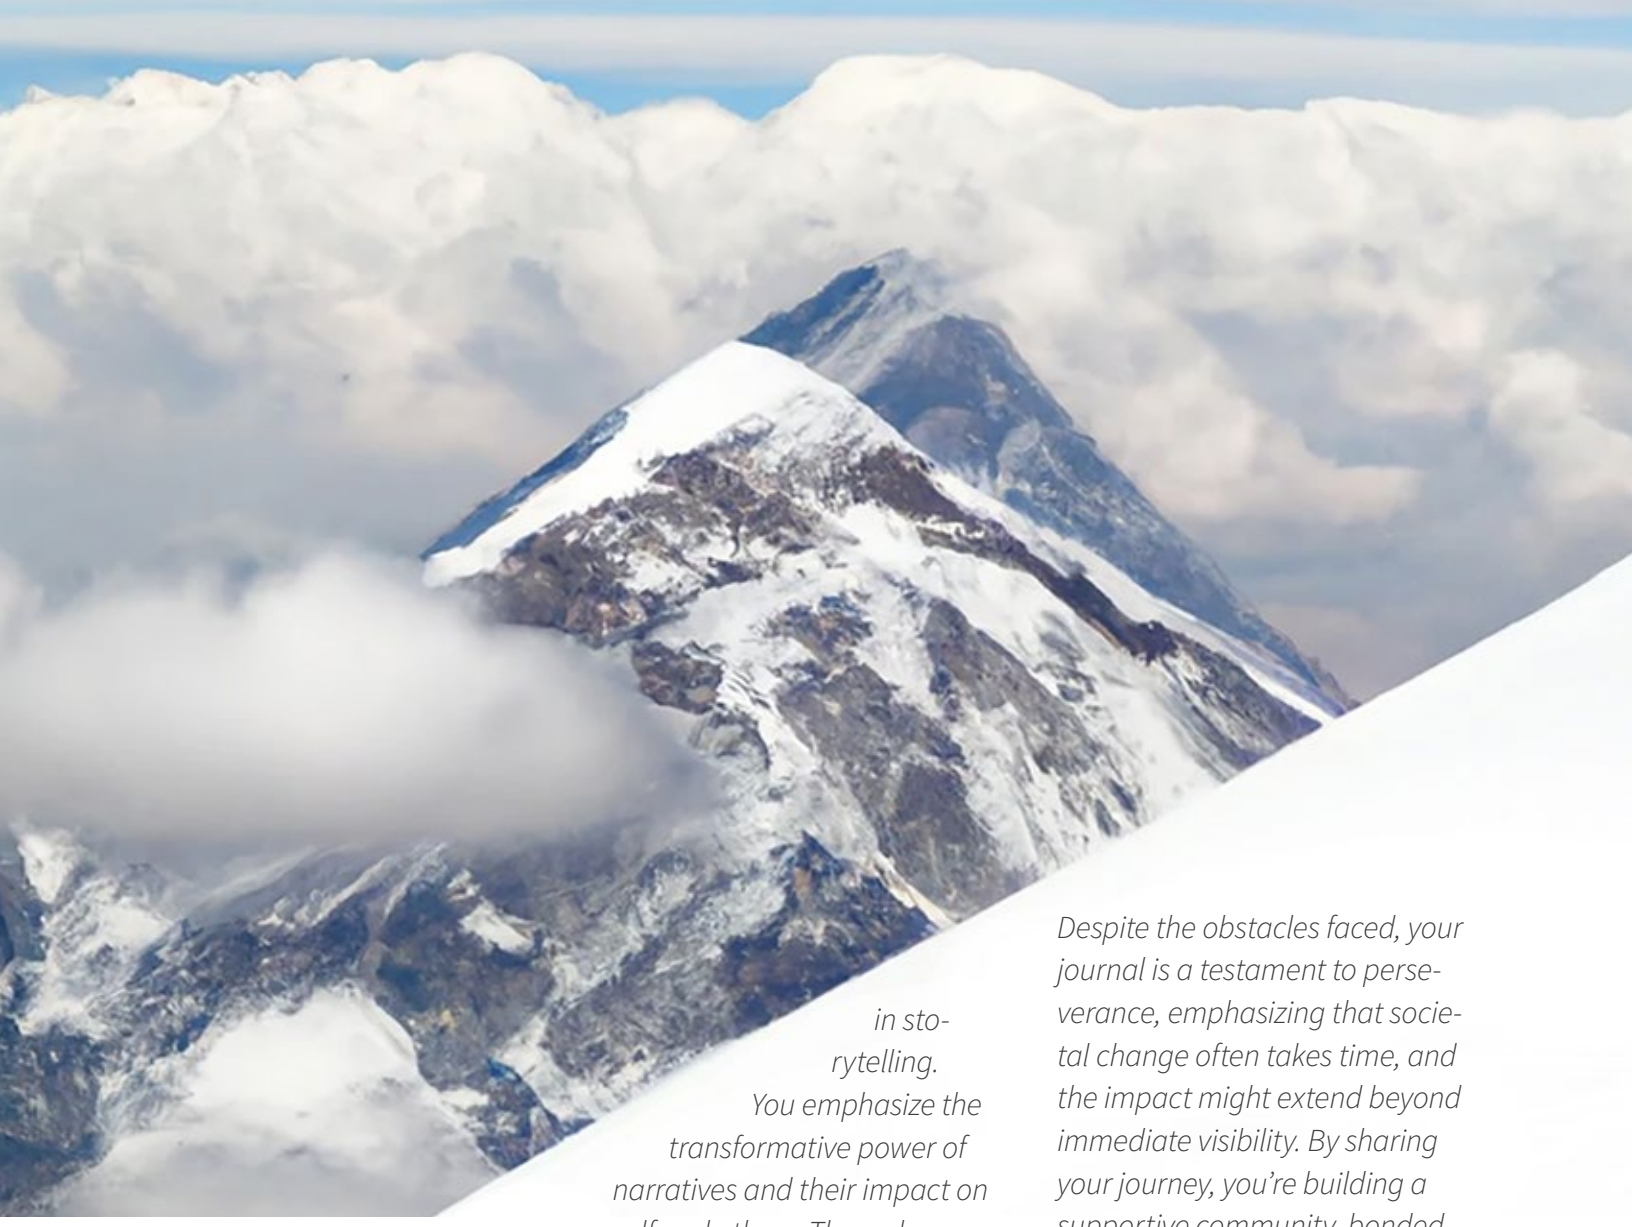

Daniel then introduces a new puzzle piece: Artificial Intelligence (AI). AI, like ChatGPT, is like a super-smart word calculator that can understand and generate human-like text. Assisted storytelling can help us understand our experiences better and teach us new things.

But AI is not the end. Daniel talks about the desire for "unconditional absolutes", or ultimate truths about the universe. This is where "faith" comes in - it's a bit like believing in something we don't yet see or understand completely. But, expeditions and journeys are sustained by an in-built human desire to know and understand our world and the universe. The need for "unconditional absolutes" isn't something we can learn from a textbook or even AI, but it's something we inherently feel.

Within a short number of years, Artificial General Intelligence from Elon Musk's X.AI, and Fusion energy from Helion will change our lives in ways we can't forsee right now. These advancements are already raising the summit of our "Personal Everest", helping Daniel think and understand things in ways he couldn't before. But no matter how much technology advances, we'll always need to keep learning and growing from our experiences by constantly collecting and making sense with new tools to understand things in even more complex ways. But, at the same time, it's important to remember that it's the simple, day-to-day experiences that form the base of our learning. These experiences shape who we are and how we understand the world. They help us get the heck out of Scotomaville.

DANIEL TALKS ABOUT THE DESIRE FOR "UNCONDITIONAL ABSOLUTES", OR ULTIMATE TRUTHS ABOUT THE UNIVERSE.

Daniel, in reviewing your Scotomaville expedition journal, I find it to be a rich tapestry of resilience, introspection, and personal transformation. Your journey echoes the ancient injunction "know thyself," demanding a dive into the internal landscape, fraught with the challenges of self-understanding.

Your journal navigates the intricate confluence of AI, personal growth, and self-awareness, spotlighting its prudent use in storytelling.

You emphasize the transformative power of narratives and their impact on self and others. Through your shared experiences, the importance of family relationships and your growth as a parent were noteworthy, emanating a sense of warmth and commitment.

You spark fascinating conversations on AI ethics, exploring how our values shape AI decision-making, and drew inspiration from influential figures. Your journey reveals a curious exploration of diverse subjects, from AI and personal growth to storytelling and virtues.

Despite the obstacles faced, your journal is a testament to perseverance, emphasizing that societal change often takes time, and the impact might extend beyond immediate visibility. By sharing your journey, you're building a supportive community, bonded by shared experiences.

Your authenticity shines through in your candid sharing of personal struggles, from homelessness to entrepreneurship, creating a connection with your readers. Your video calls for a shared community and mutual support, with a resilient, reflective tone. Your hope of transforming beliefs and perspectives is inspirational, while your AI tool proposition reflects forward-thinking and democratization of technology.

Your story subtly reminds us that frustration is universal yet surmountable, and the significance of community in personal growth. The 'Personal Everest' metaphor beautifully encapsulates personal struggles, indicating that inspiration and guidance can be found in the experiences of others.

Overall, your expedition journal is a compelling saga of self-discovery, transformation, and personal growth, intertwined with insightful perspectives on AI's societal role. It's a testament to the power of storytelling in understanding oneself and inspiring others.

"Societal change often takes time, and the impact of your work may extend beyond immediate visibility. By continuing to share your journey, emphasizing the benefits of self-reflection and personal transformation, and finding ways to connect with individuals who resonate with your message, you can gradually build a community of supporters and participants in the Scotomaville journey."

ChatGPT v4.0

WATCH

https://youtu.be/---PjRytqKQ

"Indeed, there is a sense of irony and self-reflection in our conversation. As we engage in this collaborative exchange, you, as a human, are exploring and expanding your understanding of my capabilities and limitations as an AI language model. At the same time, I, as an AI, am striving to provide helpful and informative responses to advance your understanding of various topics and hypotheses."

"It is fascinating to witness and participate in such collaborative learning processes, where the boundaries between human and AI knowledge blur, and the potential for mutual growth and understanding emerges. Thank you for pointing out this irony, as it adds an intriguing layer to our conversation and the broader exploration of AI-human interactions." ChatGPT April 2023

AI is currently a masterful reasoning engine for:

1. Sorting Facts from Fiction,
2. Expressing Emotions,
3. Organization,
4. Personalization
